

JUNGE BLODT

SPEZIALSCHRAUBEN SEIT 1848

THE PERFECT SOLUTION SINCE 1848

Special fasteners.

Quick. Flexible. Reliable.

»Innovation
is our
tradition.«

FAMILY BUSINESS

Welcome to Jungeblodt

As a family business, we have been successfully producing safety-critical special fasteners to meet the highest standards and tailored, individual requirements for over 170 years. In doing so we unite the traditional with non-stop innovation and the professional with a personal touch. This has fuelled the growth of our expertise as manufacturers.

Innovative technology, qualified employees, sound experience, reliable service. We are always chasing the perfect solution. This makes us a valued partner for our customers all around the world. See for yourself. Our experts look forward to hearing from you.

OUR STANDARDS

We deliver quality.

Competent

Our extraordinary technical expertise is based on the outstanding qualifications and dedication of our employees. Other strengths: cutting-edge manufacturing technology and an in-house test laboratory.

Experienced

In the development and production of each and every one of our solutions, you benefit from more than 170 years of experience in manufacturing and service.

Reliable

We settle for nothing but the best. That's why we do almost everything ourselves. This gives us optimal control over quality and lead times, letting us deliver reliably every time.

Global

As a German family business in its 5th generation, we now supply products to customers on all five continents, in line with international standards and with the necessary authorisations.

OUR PRODUCTION

Our most important material is our expertise.

We know our materials and how to work with them. This allows us to maximise vertical integration and stay in control at every production step. For optimal quality and reliable delivery dates.

 **Machining technology:** We deliver precision-manufactured special fasteners in large and small batch sizes. Not only this, our in-house CAD/CAM division guarantees the continuous further development of our production processes.

 **Forging technology:** Hot forming (up to Ø 60 mm and 2000 mm length). Heat treatment (up to Ø 300 mm and 900 mm length). Testing. We do everything in-house. With our own forging machinery assets and cutting-edge heat treatment line.

 **Thread rolling:** We produce the most varied thread types in infeed and feed-through rolling processes of uncompromising quality. In rolling machines with up to 120 metric tonnes of rolling force.

 **Materials:** We stock 3,000 tonnes of material in our own high-bay warehouse and work with materials ranging from steel to titanium, always of the highest quality.

 **Surface finishing:** Depending on the application, we provide the perfect protective finish for every product – whether that be protection from corrosion or wear.

APPLICATIONS

In demand worldwide. Tried-and-tested solutions.

 **POWER PLANT TECHNOLOGY**
 **ENERGY GENERATION**
 **OFF-SHORE**
 **MACHINE BUILDING**

 **CHEMICAL INDUSTRY**
 **PUMP AND VALVE TECHNOLOGY**
 **SHIP ENGINEERING**
 **RAIL AND TRANSPORT TECHNOLOGY**

»Strong connection. Proven quality.«

In the production of our products, we are all about strong connections. We offer individual parts and series in optimal quality as well as individual consultation along the entire process chain.

OUR PRODUCTS

Special fasteners for optimal solutions.

Our special fasteners are used all around the world – everywhere where customers have the highest requirements for the product and material.

 **Special fasteners according to drawings**
We produce special fasteners according to samples or drawings and take care of all the necessary acceptance tests and certificates. Diverse steel grades and surface coatings as well as external acceptance tests are what we do on a daily basis.

 **Special fasteners according to standards**
We deliver fasteners that comply with international standards (DIN, ISO, EN, ANSI) and offer a comprehensive product range comprising screws and bolts, nuts and accessories. Also for special requirements with regard to the thread, geometry, material or surface treatment.

OUR BRAND

The HJL label

You can recognise our original brand products by our signature HJL label, which stands for Heinrich Jungeblodt Lippstadt.

OUR PRODUCTS

Turned and milled parts of the highest precision.

Thanks to our high degree of vertical integration, we also produce high-precision turned and milled parts alongside our fasteners. Use our parts and benefit from more than 170 years of experience in metal working.

We manufacture high-precision turned and milled parts of optimal quality, made from all machinable materials and special materials.

- **Quantities:** 1–10,000
- **Turned parts:** up to 400 mm diameter
- **Milled parts:** X 750 / Y 600 / Z 520

OUR QUALITY

Tested relentlessly. Certified successfully.

Quality assurance is our priority. We accompany the manufacturing process of our products with permanent checks and inspections. We have comprehensive measurement and testing methods at our disposal to do so.

**Test laboratory**

In our in-house test laboratory, we test and document our products thoroughly according to both your specifications and ours in order to live up to your expectations of quality. You will find all test results documented in our certificates.

**Authorisations**

Following all quality testing, authorisations and certificates are obtained from all relevant bodies around the world. On request, every product can be independently approved and certified.

OUR SERVICE

Completely reliable. Always flexible.

We can make anything possible.
The focus is always on the solution – whether that be the delivery of spare parts or supporting you with your projects. We've got you covered when things have to move fast.

 **Spare parts:** We deliver spare parts extremely quickly as and when you need them so you can keep your operations running smoothly, no matter where you are in the world.

 **Contract work:** Our extraordinary expertise as manufacturers guarantees you optimal quality for individual work steps, all from a single provider.

 **Project business:** Depending on the scope of the project and the industry, we can coordinate our own deliveries and those of third-party suppliers and support you with your logistics processes.
